

## **Product Profile**

### **Latitudes® Composite Decking & Railing**

*180° from the ordinary™*

Latitudes® Composite Decking and Railing embodies the best characteristics in deck materials that today's homeowners seek—long-lasting beauty with little maintenance—while giving builders the ease of installation they demand.

What makes Latitudes decking and railing special is the Strandex® technology it employs. Like individual strands of a rope make the rope stronger, Strandex technology makes Latitudes decking and railing stronger. Strandex technology offers superior protection against UV degradation and water absorption, because every "strand" of wood fiber is encased in high-density polyethylene. Latitudes uses Strandex inside, so you can be assured that you're getting the highest, most consistent quality and strongest composite product available in the industry

Latitudes composite decking and railing also does its part to preserve the environment. Made from approximately 70% recycled materials, Latitudes uses 100% reclaimed wood dust from select manufacturing facilities throughout the country. Latitudes is formulated with a mixture of virgin and recycled high-density polyethylene, which promotes product longevity and environmental friendliness.

Latitudes won't splinter and resists rotting and splitting, providing long-lasting beauty and comfort with no sealing, painting or staining required. Latitudes composite deck boards come with a 15-year limited warranty and are available in 12-, 16- and 20-foot lengths in four classic colors: redwood, cedar, gray and walnut. They're also available in two new rich, tropical colors: adobe and koa.

### ***Latitudes Slotted Decking***

Latitudes slotted decking features the Equator Hidden Fastener, which eliminates pre-drilling and automatically spaces the composite deck boards with the proper gap, making installation quick and easy.

#### ***Latitudes Natural Railing***

Latitudes Natural Railing is made from the same durable materials found in Latitudes Decking. The attractive moulded profile creates an eye-catching accent to any exterior architectural design, adding to its timeless beauty. This durable, elegantly appointed railing also comes in redwood, cedar, gray and walnut.

#### ***Latitudes Ornamental Railing***

Latitudes Ornamental Railing offers extensive design options by combining long-lasting composite handrails and posts with beautifully-crafted metal balusters, centerpieces and post caps, to add a level of style and sophistication to any deck. Latitudes Ornamental Balusters are made of heavy-gauge aluminum that comes powder-coated in four attractive colors: stainless, white, black and bronze. Centerpieces easily attach to balusters using self-drilling screws and are available in black, white and bronze. Latitudes Ornamental Post Caps feature classic, square solar and pyramid profiles.

Latitudes Decking, Natural Railing and Ornamental Railing feature a 15-year Limited Warranty and have passed the rigorous testing requirements by the ICC-ES for wood/plastic composite deck boards (ESR 1573 Report).

Universal Forest Products engineers, manufactures and markets wood and wood-alternative products for DIY retail home centers; structural lumber products for the manufactured housing industry; engineered wood components for the site-built construction market; and specialty wood packaging and components for various industries. The company's consumer products division includes wood and wood-composite decking and railings, decorative balusters and post caps, and other outdoor living products for the spectrum of tastes and budgets.
