

OSI Green Series Adhesives and Sealants

Henkel International describes its OSI Green Series as high-quality interior and exterior sealants, construction adhesives, and specialty sealants that combine high performance with environmentally friendly formulations.

The very low-VOC products contribute to improved indoor air quality while making structures more energy efficient, and the company also says its OSI Green Series products far exceed what is considered VOC-compliant.

The series includes Drywall & Panel Construction Adhesive, High Performance Sub-Floor & Deck Adhesive, Draft & Acoustical Sound Sealant, Pro-Foam Minimally Expanding Sealant, Flame Seal Fire, Smoke & Draft Stop Sealant, and Acrylic Urethane Indoor/Outdoor Sealant.

Windsor Windows & Doors Glazing System

Windsor Windows & Doors has recently installed new equipment used to make Insulated Glass (I.G.), creating a new glazing system. The company says the quality of materials and machinery used in Windsor's Glazing System will be used to produce some of Windsor's existing product lines, in addition to producing a new enlarged vinyl offering called Next Dimension Pro.

The company says this new vinyl product will have a custom extruded profile, which creates visual dimension and attractive sightlines.

Grace Tri-Flex Xtreme Synthetic Roofing Underlayment

Grace Tri-Flex Xtreme is a synthetic roofing underlayment that features the company's Traction XT Skid Resistant Technology. The company says its proprietary coating helps boots grip the surface when wet or dry and that the product offers several advantages over 30-pound felt and traditional synthetic roofing underlayments, including superior traction, durability, tensile strength, a lighter weight, and that each roll covers more area.

Tri-Flex Xtreme comes in rolls of 41.5-in. x 289 ft. and covers 10 full squares. It is applied to the roof deck with cap staples or cap nails and can be installed underneath all mechanically attached sloped roof coverings, including shingles, tiles, slate, metal, and cedar shakes. 866.333.3726 or www.GraceAtHome.com

Milgard Windows & Doors SmartTouch Lock

Milgard Windows & Doors designed its SmartTouch lock to provide style and ease of operation with security.

The SmartTouch lock enables windows to be opened and closed, locked and unlocked in one smooth motion. The SmartTouch lock is available exclusively on Milgard's Tuscany and Montecito series of premium quality vinyl windows.

Unlike conventional cam-style locks mounted atop window sashes, the SmartTouch has an integrated, low-profile design. The lock mechanism is recessed into the window frame, providing a clean, sleek look. When the window is closed and locked, the latch is down and out of sight. When the window is open, the latch stays open, indicating the window is unlocked.

Universal Forest Products ProWood Micro

Universal Forest Products ProWood Micro treated lumber is a next-generation of pressure-treated wood. The company describes the material as less corrosive, which means it doesn't require expensive nails or stainless steel fasteners. The lumber is pressure-treated using a waterborne preservative that contains copper and quaternary compounds to protect against termite attack and decay. ProWood Micro is available in natural wood-tone colors called MicroShades.
